

 Rice ANN

This application uses an Artificial Neural Network to classify rice grains based on their physical characteristics.

 Model

Artificial Neural Network

 Features

10 input features

 Preprocessing

Standard Scaler

Rice Classification ANN Project

Classification using ANN

Artificial Neural Network based Rice Grain
Classification System

 Enter Rice Grain Features

Enter the physical characteristics of the rice grain.

Prediction Result

Predicted Class: 1

Prediction Confidence

60.00%

Input Summary

Area: 5010.0

Equivalent Diameter: 77.0

Major Axis Length: 100.0

Extent: 0.75

Minor Axis Length: 70.0

Perimeter: 300.0

Eccentricity: 0.75

Roundness: 0.75

Convex Area: 5110.0

Aspect Ratio: 1.5
